Robust CSI-2 based Alvium cameras with FPD-Link III interface

Benefit from greater flexibility in cable lengths

Alvium FP3 STP cameras with FPD-Link III (Flat Panel Display Link) interface have been designed to overcome the limitations of standard CSI-2 cameras. The closed housing CSI-2 based cameras come with integrated serializer and a rugged HSD STP connector for cable lengths up to 10 meters. This connection can also be used to power cameras (Power over STP), enabling single cable solutions.

The standardized CSI-2 driver ensures quick integration with the flexibility to change camera models easily.

To operate Alvium FP3 cameras on your vision system, Allied Vision provides different access modes: - [Direct Register Access \(DRA\)](#) to control the cameras via registers for advanced users. - Video4Linux2 Access allows to control the cameras via established V4L2 API and applications like GStreamer and OpenCV. Open-source CSI-2 drivers are available on [GitHub](#) for different boards and systems on chip (SoCs).

In addition to lens mount and housing options, see [Customization and OEM Solutions webpage](#) for additional options.
